PROFIL

For many years we have been developing and manufacturing trap machines for some of the worlds finest shooters.

We believe in, and produce, high quality trap products so as to offer our customers, not only a safely operating trap, but also a high performance machine, with precise throwing.

We offer a range of models and sizes, so we can supply exactly the trap you need. All of our traps conform with the latest EU standards, making them the safest available.

Our master trap program covers everything you need, encompasses all the components - from computer guided trap systems to single machines.
